

Los Angeles Dodgers Dashboard.

Focusing on the results achieved by the 2024 MLB's World Series Champion, Los Angeles Dodgers, I capture the results from the team's Standard on Batting Baseball Reference webpage for the Regular Season using Power BI's web page scraping feature.

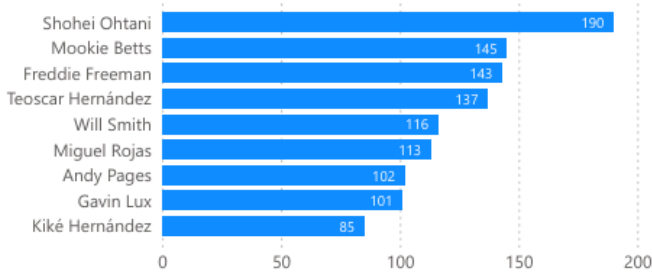

Showcased the results for specific stats like OPS+ to see the team's best performers based on their batting compared with the league's average and the best batting averages within the team. Also made a web scraping with BeautifulSoup library in Python to get data from Sportrac contracts.

After having the data, I created a correlation matrix to make a relation between the salaries and the stats that have more relevance to each player's salary. This matrix was build with pandas library in Python.

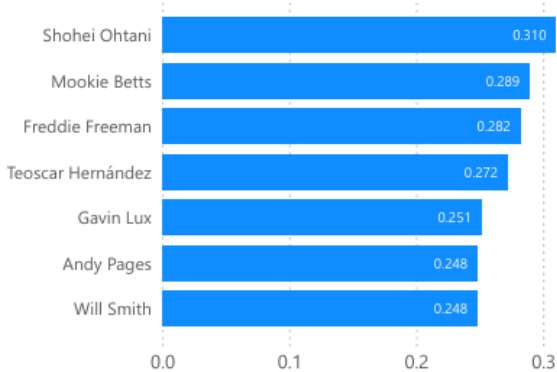

The dashboard was made with Power BI.

Análisis Dodgers de los Ángeles temporada regular 2024
De acuerdo a bateo estandar Baseball Reference

Top 9 OPS+
